Texas Commission on Environmental Quality**

Pollution Prevention Workshops

P2 Workshops

The Waste Reduction Policy Act (WRPA) requires pollution prevention planning for some facilities,* but how do you get the most from your pollution prevention (P2) plan?

If you are composing a new P2 plan or renewing your P2 plan, you have an opportunity to:

- Save Money
- Reduce your Regulatory Burden
- Increase Efficiency

About the Workshop

Experts in pollution prevention, environmental management systems (EMS), environmental regulations, lean manufacturing and energy efficiency conduct an interactive workshop with classroom exercises that will help you use P2 strategies to improve your bottom line.

Who Should Attend

This workshop will benefit individuals from large and small companies.

It is geared towards:

- Environmental, Health, and Safety Managers
- Plant Managers
- Production Personnel
- Engineers or Related Professionals
- Facilities Managers

*Facilities that are a Large Quantity Generator, Small Quantity Generator of hazardous waste and/or facilities that report on the Toxics Release Inventory (TRI) Form R are subject to WRPA regulations.
